### 2.7. SPORT AND THE NATIONS.

How cosmopolitan modern- sport is becoming ! The reflection is inevitable on reading the home papers of last week. Never surely was there a time when the nations were so mingled in friendly rivalry, when so many international contests were proceeding simultaneously. All the papers are full of it, so full that we have almost been tempted to forget that other and grimmer kind of "test match" which has been in progress in the Black Sea and in Eastern Asia.

During the past week or two the representatives of different peoples have been competing against one another in many ways. The champions of Great Britain have been waging stubborn warfare with the best players of Australia on the tented field, in the finest of all games that man has devised. It was a Homeric match, and if the brilliant play of the home side did not give them the victory, they must feel, as Britons, proud of the bull dog tenacity which enabled the Australians to stave off defeat. England, too, has been at hard grips with another branch of the Anglo-Saxon race elsewhere. At Wimbledon the Australian cracks were just beaten for the doubles in the lawn-tennis tournament by the Englishmen, Smith and Riseley. But the true champion in this contest is Miss Sutton, the young Californian girl who has been giving our English ladies new ideas on the game.

Perhaps even more generally interesting was the duel between England and America at Henley. The race between Leander and Vesper for the Grand Challenge Cup was the event of the regatta. The hopes of Americans ran high, as they did two years ago, when the Philadelphians entered for the cup, and if the Vesper crew had succeeded in bringing back the trophy with them the people of the United States would have been hard put to it to find adequate expression for their enthusiasm. A fresh element of interest was added to the contest on this occasion. The Belgian crew from Ghent proved unexpectedly strong, and won their heat with exemplary ease, and there was even an

apprehension in the minds of some onlookers at one moment that Leander, having disposed of the Americans, might themselves succumb to the redoubtable Flemings. Beyond the Channel all the world was exciting itself over the great motor race for the Gordon Bennett Cup, with England, France, Germany, Austria, Italy, and the United States all represented. Motor racing seems to us a foolish, dangerous, and useless pursuit, which ought to be discouraged ; but international it assuredly is. Then on Monday began the Bisley meeting, where our best shots will have to hold their own against the picked riflemen from across the ocean.

Sport, then, it seems, is now a real bond between the nations. There is a useful give and take, a pleasant interchange in these matters. A French horse may win the Derby.

An English driver might have carried off the Gordon Bennett Cup. The Americans have beaten us on the running ground, and we may be sure they will try and try again at Henley until they defeat Leander, perhaps to find themselves in their turn worsted by a crew from the Meuse or the Rhine. For it seems that Continental athletes know how to row, just as they are even learning to play cricket.

This is one of the incidental advantages of international sport. It not only enables the nations to know one another, but it helps them to take the advice of the Greek sage, and to know themselves. It knocks a little of the conceit out of them. The time was when we thought that excellence in athletic exercises was our own monopoly—the natural birthright of the Briton. We should have laughed at the notion that a French man, a Belgian, a German, could be a real sportsman, could equal us in a fair trial of strength, courage, and nerve. We know better now. We know that our superiority was mainly a matter of training and practice. The other peoples, when they prepare themselves in the same fashion as ourselves, do very well. We hold our own still, but we have to fight hard for first place against foemen who have no natural inferiority. That, at any rate, ought to do something to rub off national and racial prejudices. Sport is a fine democratic leveller. It teaches the peoples to respect one another, since it shows that the sportsman may come from any country which take the trouble to teach him rightly, and give him fitting encouragement for the development of his powers.

## 2.8. SPORT FOR THE GODS.

Interesting as the announcement is that the Olympic games of Greece are to be revived, one rather hesitates to extend all unrestrained welcome to the project until its details take more definite shape. The attempts that have hitherto been made to imitate the historic meeting have turned out decidedly second-class affairs. It is a difficult task that the organisers have before them. To strike the elusive thread on success, the revival must neither be too painstakingly archaic nor too painfully modern. It must evade the similitude of a Barnum show on the one hand, and of a bicycle gymkhana on the other. Simplicity is the first requisite. Let there be no crimson cloth or blare of trumpets. The second is the presence of really representative athletes. In this connection we are glad to see that an earnest effort is being made to draw on the best talent of England, and a strong British committee has been formed with this object. Given these two primary conditions, the "pulvis Olympicus" may yet perhaps be the scene of a meeting not entirely unworthy of the glorious past.

## 2.9. CALENDAR OF THE WEEK.

(Coptic and Mohamedan.)

Sun. 9

Mon. 10 The blessed Nile begins to rise abundantly.

Tues. 11 Abundance of honey.

Wed. 12 Sow Syrian dūrah.

Thurs. 13 Period of regular north-west winds.

Fri. 14 H.H. the Khedive Abbas Hilmi born, 1874. Season of grapes,

Sat. 16 General purification of the air. Abundance of cactus fruit.

# 3. THE EGYPTIAN GAZETTE, THURSDAY, JULY 13, 1905.

## 3.1.

### 3.1.1. THE PEACE CONFERENCE. CHINESE INTERESTS. NOTE TO THE POWERS.

Peking, July 12.

China has notified the Powers that she will refuse to recognise the arrangements made by the Peace Conference concerning Chinese interests unless she is consulted. Japan has replied that the notification will in nowise affect her plan of action. (Reuter.)

### 3.1.2. THE JAPANESE LOAN.

Berlin, July 12.

The German section of the Japanese loan is largely over-subscribed. (Reuter.)

### **3.1.3. FRANCE AND GERMANY. FURTHER DISCUSSION.**

Berlin, July 12.

It is asserted that, though the Franco-German negotiations are not concluded, now that M. Rouvier has accepted the conference, Germany is prepared to enter into a more detailed discussion as to her aims, and the purpose of the conference. (Reuter.)

### **3.1.4. THE "ENTENTE CORDIALE." FESTIVITIES AT BREST.**

Brest, July 12.

The festivities are going on with extraordinary cordiality. The British and French Admirals and officers are luncheoning and banqueting. The crews are thronging the streets and fraternising in the cafes. (Reuter.)

### **3.1.5. ENGLAND AND ABYSSINIA. FRONTIER DISPUTE ENDED.**

London, July 12.

An arrangement has been concluded between Great Britain and Abyssinia by which the long-standing dispute as to the western frontier is ended. (Reuter.)

### **3.1.6. A NEW MAHDI.**

London, July 12.

Reuter's Agency learns that a new Mahdi has appeared on the coast in the district to the east of Berbera. (Reuter.)

### **3.1.7. ACCOUCHEMENT OF PRINCESS OF WALES.**

London, July 12.

The Princess of Wales has given birth to a son. (Reuter.)

### **3.1.8. NEW RUSSIAN MARINE MINISTER.**

St. Petersburg, July 12.

Admiral Birileff has been appointed Minister of Marine. (Havas.)

### **3.1.9. SEIZURE OF BOMBS AT TIFLIS.**

Batum, July 12.

Four persons, possessing altogether 119 bombs, have been arrested separately at Tiflis. (Reuter.)

### **3.1.10. FRENCH SENATE.**

Paris, July 12.

The Senate has adopted by 243 to 14 the amnesty mentioned on the 27th June. (R.)

#### **3.1.10.1.**

Paris, July 12.

The Senate has voted the amnesty for those sentenced by the Haute Cour. (Havas.)

### **3.1.11. WALES COLLIERY EXPLOSION.**

London, July 12.

There were 125 men killed at the colliery explosion at Wattstown. (Reuter.)

### **3.1.12. FIRE IN A COLLIERY.**

Dortmund, July 12.

Thirty-nine men have been hopelessly entombed in a colliery here, on account of a fire. (Reuter.)

### **3.1.13. ACCIDENT ON H.M.S. "IMPLACABLE"**

Gibraltar, July 12.

Two men have been killed and seven injured by the bursting of a steam-pipe on the battleship Implacable. (Reuter.)

### **3.1.14. HOME CRICKET.**

London, July 12.

The Players beat the Gentlemen by 140 runs. Australians beat Derbyshire by 105 runs. Northamptonshire beat Hampshire by 231 runs. Sussex v. Leicestershire drawn. (Reuter.)

## **3.2. LOCAL AND GENERAL.**

### **3.2.1. Suakin Province.**

The head-quarters of Suakin Province were moved to Erkowit (temporarily) yesterday.

### 3.2.2. *The Plague.*

Yesterday's bulletin records a fatal case at Alexandria and another at Port-Said. The former was that of a young native girl who was found dead at her home at Tonbughie.

### 3.2.3. *Suicide.*

A skin-seller named Salim Ghonaim, who is believed to have suffered from domestic troubles, hanged himself at 3 a.m. yesterday at Mazar. An inquiry has been opened.

### 3.2.4. *Suez Canal.*

9 vessels passed through the Canal on the 10th inst., 4 of which were British, 2 French, 2 German, 1 Spanish. The day's receipts were frs. 278 625, making the total from the 1st inst. frs. 2,920,349.34.

### 3.2.5. *Land Bank.*

The committee of the London Stock Exchange have been asked to appoint a special settling day in Land Bank of Egypt—Bearer warrants for 95,000 ordinary shares of £5 each, fully paid.

### 3.2.6. *Egyptian Investment and Agency, Ltd.*

A mortgage or charge, dated 15th June, 1905, to secure £50,000, has been registered. Property charged—The whole of the company's present uncalled capital—namely, 15s. per share on 200,000 shares. Holders — Anglo-Egyptian Bank, Ltd., Alexandria.

### 3.2.7. *The Mex Affair.*

The owner of Al Hillal dispensary, the body of whose brother, Metri Kanaan, was recently found near Mex and noted at the Government Hospital as that of a Sudanese, has submitted a memorial to the Parquet with full details of the disappearance of the dead man. We hear that Sir Horace Pinching Pasha has been investigating the affair, and that the responsibility for the error has been fixed.

### 3.2.8. *St. Andrew's Girls' Lower School.*

The annual exhibition and prize distribution took place in this school yesterday, when, before a large gathering of parents and friends, a varied and interesting programme was submitted. The Rev. H. P. Reid occupied the chair. Songs and recitations in English, French, Italian, and Arabic elicited hearty applause, while a display of musical drill was greatly appreciated. The whole performance was excellent, and reflects the highest credit upon Mrs. Gibb and her assistants. Mrs. Reid presented the prizes to the successful pupils, amongst whom we especially mention C. Grilla, who won a medal for Scripture knowledge, presented by Major Allan of Glasgow.

### 3.2.9. *Cairo Tramways.*

The Cairo Tramway Company's steamer service between Rod el Farag and the Delta Barrage has now been modified as follows : Departures take place from Rod el Farag every Friday at 5 p.m. and Sunday at 8.30 a.m. and 5 p.m., and from the Barrage every Friday at 7.15 p.m. and Sunday at 11 a.m. and 7.15 p.m. Every Thursday and Saturday steamers leave Rod el Farag at 2 p.m. for a two hours' excursion on the Nile. From the 13th to the 19th inst. inclusive there will be a moonlight service to the Barrage, leaving Rod el Farag at 8.30 p.m. and the Barrage at 10.30 p.m. On the above-mentioned dates trams will run on the Rod el Farag line until the return of the boat. On the Pyramids line there will be a moonlight service on the 14th, 15th, 16th, and 17th inst., the last tram leaving Kasr-el-Nil at 10 and 11 p.m. and the Pyramids at 10.50 and 11.50 p.m.

## 3.3. SPORT AND PLAY.KHEDIVIAL YACHT CLUB. REGATTA.

The following is the result of yesterday's regatta :—

Table 5.

The Jessica, when rounding Gabbary buoy on a wind, was unfortunately run into on the port bow and out down to the water line by the Celtic, of Class I., which was coming down before the wind to round the same buoy.

Assistance was rendered by the Celtic and Tier-el-Mina and both of these boats of course lost their race.

The gap cut in the Jessica was stopped up with canvas and she put into dry-dock at Gabbary, where she discharged all her ballast.

### 3.5. THE YEMEN RISING.ADVANCE OF TURKS IN FORCE.

Aden, July 12.

The Turks are preparing to advance in great force from Hodeida and Tais simultaneously against Sanaa. It is feared that the rising will become general. (Reuter.)

"Die Post" gives the following summary of the position in the Yemen :—

The insurrectionary movement in the Yemen has given the Ottoman authorities more trouble than ever, though the military authorities appear to be acting with the necessary energy to prevent any further extension and continuation of the troubles, which might lead to a most serious situation in conjunction with the disturbances in the European portion of the Empire. A Turkish officer who has returned from Arabia gives the following interesting details which are not marked by any excessive optimism.

He states that the number of the followers of the insurgent Sheikh Mohamed Yehya, instead of reaching 150,000 men, does not greatly exceed 40,000. At the opening of the campaign not more than four or five thousand armed guerillas were in the field, but their numbers rose rapidly as the Arab troops of the Turkish Expeditionary Corps surrendered to them and the Yemenis, emboldened by each of their successes and especially by the capture of Sanaa, joined them. The present strength of the rebels is formidable enough, if the climatic conditions, from which the Turkish soldier suffers terribly, are taken into account.

The present Turkish force consists of three full brigades — Albanians, Lazes, and Turks, who are absolutely reliable, unlike the Syrian and Arab conscripts. The despatch of soldiers to the front continues. Meantime the communications and transport of the force are being assured and a large number of transport mules are being sent from the Syrian Coast to the Arabian ports.

### 3.6. MESOPOTAMIA. SIR Wm. WILLCOCKS'S SCHEME.

Sir William Willcocks's scheme for the irrigation of Mesopotamia is made the excuse for a letter in the "National Zeitung," again pleading for the participation of British capital in the construction of the Bagdad Railway. The letter declares that the English see in the irrigation scheme a possibility of obtaining the construction of the Bagdad-Basra section of the line, which, the writer asserts, will be cheaper than the southern (? northern) portion, as it presents no natural difficulties, and, therefore, Germany must not allow it to fall into British hands. The letter continues:—"In view of the Emperor's great personal influence in the East, Sir William Willcocks will not prevail with the Sultan; but I am convinced that if Great Britain and Germany combined their interests, the desired concession would be granted." The writer then expatiates on the beneficial effects to be expected from irrigation in Mesopotamia by promoting cotton-growing and the cultivation of corn, barley, dates and tobacco. These benefits, he thinks, would be felt by the Bagdad Railway, which would profit by the increased passenger and goods traffic. He concludes by expressing the hope that Sir William Willcocks's scheme may be amalgamated with the Bagdad Railway, so that Germany, France (who is already interested to the extent of 40 per cent. of the capital), and Great Britain would take part in it. He declares, however, that the management of the whole undertaking must remain in German hands.

### 3.7. THE RION AT PORT SAID.

Port Said, Thursday.

The Russian cruiser Rion arrived here at six o'clock last evening and sails for Libau at four o'clock to-day. She has taken on 500 tons of coal besides water and provisions. Her armament consist of 14 4.7-in. guns and 21 of smaller calibre. She has collision mats and hydraulic ammunition lifts, and has naval officers and crew on board. Visits were exchanged to-day between the commander of the cruiser and that of H.M.S. Suffolk.

### 3.8. SUDAN APPOINTMENTS.

El Kaimakam Angus Cameron Bey, Acting Senior Inspector, Upper Nile Province, has been appointed a magistrate of the first class under the Criminal Procedure Code.

El Miralai A. Sutherland Bey has been named Acting Governor, Bahr-el-Ghazal Province.

Mr. G. C. Kerr, Deputy Inspector, to be Junior Inspector, Suakin Province.

Mr. C. E. Lyall, Deputy Inspector, to be Junior Inspector, Kordofan Province.

Mr. S. Skirmunt is appointed Deputy Inspector, Woods and Forests Department.

### 3.9. STEAMER MOVEMENTS.

The Messageries Maritimes S.S. Equated arrived at Marseilles from Alexandria yesterday morning.

The Westcott S.S. Joshua Nicholson left Malta yesterday and is due here on Sunday from Antwerp and London.

The Papayanni S.S. Austrian left Malta this morning and is due at this port on Sunday.

### 3.10. THE LATE GRAND MUFTI. IMPOSING FUNERAL.

A large crowd assembled at the Cairo station about 2 o'clock yesterday afternoon to await the arrival of the special train conveying the mortal remains of the late Sheikh Mohamed Abdou from Alexandria for interment in the Capital. The train drew up at platform No. 1. exactly at 2.36 p.m. and as soon as it came to a standstill the many who had accompanied the body from Alexandria dismounted and swelled the number who were waiting on the platform. The large assembly then gathered round the carriage in which the coffin had been placed. When the doors were opened, and the bearers had mournfully raised the bier on their shoulders the crowd parted and silently stood aside to admit the passage of the coffin, which was carried to a room opening on to the platform, there to await the appointed hour of four o'clock when the funeral cortege would leave the station. The room in which the coffin lay was closed and guarded by four policemen.

Meanwhile the crowd grew larger and larger, but the people were not admitted to the platform, which was reserved for those who were to form the cortege, and the entrance soon became so crowded that access to the platform was a matter of considerable difficulty. Shortly after half-past three the mourners began to arrive and increased in numbers continuously until 4 p.m. Every Ministry and public office was fully represented ; Egyptian and English officials alike had come to pay their last homage to a man who had played throughout his public life an eventful part in the Mohamedan world of Egypt, and who had gained the respect and admiration of all who came in contact with him, even of those who actively opposed his ideas and schemes.

At four o'clock the coffin was carried out of the room where it had been laid and the procession, leaving the station by the side exit, started on its way to the place of burial. The procession was headed by an officer of the mounted police, and after him came twelve other mounted police, who were followed by fifty foot police in double file. Next came the coffin, a simple bier without adornment, and only covered by a cloth, as is the custom with those belonging to the Mohamedan religion, and this was carried by ten men, several of whom wore the green turban. The bier was followed by a large number of the students of the University of Al Azhar, and these were followed by the lawyers and judges of the Native Tribunals in their robes of office. The English representatives of the various Ministries and public offices and of the Army of Occupation followed. Mr. P. W. Machell, Adviser to the Ministry of the Interior, the Hon. C. James, Mr. Moberley, Mansfield Pasha, Commandant of Police, Brig.-General Bollock, Sir H. Pinching, Director General of the Sanitary Department, Mr. Goodman, Mr. W. Swanson, representing the Ministry of Public Instruction, and many others had come to take part in this procession, and behind these was a large number of those who have been connected with the work of the deceased.

It was an immense and most impressive and solemn cortege, and as it passed along it was swelled by the crowds who lined the streets. All traffic in the streets through which the procession passed was stopped, and the huge crowds stood silent and respectful until it had passed them. It appeared indeed as if the whole native population of Cairo had come to pay their last respects to the great Sheikh, and Europeans were also present in large numbers. The procession passed along Sharia Bab-el-Hadid, Sharia Kamel and Opera-square, where the English representatives left it, and it then continued across Ataba el-Khadra-square, the Mousky, and Sikkat Guedidah to the Mosque of Al Azhar, where the customary ceremony previous to interment took place, and there the procession was reformed and wended its way to the cemetery of Megawreen, where the body was laid in its final resting place.

Our Tahta correspondent telegraphs :-The death of the Grand Mufti has caused unspeakable lamentation here. All the people condole with each other for the irreparable loss and implore the divine blessing on the dead sheikh.

### 3.11. PERSONAL AND SOCIAL.

Prince and Princess Arisugawa of Japan, who have been on a visit to England, left London on Tuesday on their return to Japan by the Norddeutscher Lloyd S.S. Preussen, which is due at Port Said on the 24th inst.

We are glad to hear that Miss Odeh, daughter of Rev. and Mrs. N. Odeh, who has been resident at the Cheltenham Ladies College for the last three years, has been awarded by the council of the college a Hay Scholarship, of £30

a year, tenable for three years at St. Hilda's Hall, Oxford, beginning next term. She hopes to prepare for the Final Honor School of Modern History.

Among the latest arrivals at the Carlton Hotel, Ramlen, we notice : Mr. S. Ades, Major and Mrs. Cave, Mr. and Mrs. P. Adamopoulos, M. and Mme B. J. Moussalli Bey and family, Mr. and Mrs. Calamaro and family.

### 3.12.

GRAND HOTEL BONNARD, ALEXANDRIA. 2s. PER DAY. WINE INCLUDED.

### 3.13. MACLEAN-ROYLE WEDDING. CEREMONY IN LONDON YESTERDAY.

London, July 12.

A very pretty wedding took place to-day at St. George's Church, Hanover-square. where Captain Charles Wilberforce Maclean, of the Lancashire Fusiliers, (attached to the Egyptian Army), son of the late Colonel Allan Maclean, R. A., and grandson of the late General Maclean, of Rowlands, Wimborne, and Lazoneby Hall, Cumberland, was married to Miss Gladys Royle, only daughter of Mr. and Mrs. George Royle, of Cairo.

St. George's Church, Hanover-square, specially popular for smart weddings, and within the past month both the King and Queen, with Princess Victoria, were present there for Lady Alexandra Acheson's marriage with the Earl of Derby's son. The music and singing are of a very high-class order, and Dr. Jolly, the organist, played finely at to-day's wedding, as he has done at previous ceremonies, his choir acquitting themselves admirably. The hymns sung were, "Lead us, heavenly Father, lead us" and "O perfect Love!" While the register was being signed Mendelssohn's anthem from Elijah, "He shall give His Angels charge over thee," rendered beautifully, and the Wedding March was a splendid finale. Mr. Douglas Morice and Mr. Maclean, the bridegroom's brother, acted as ushers and the numerous guests were shown to the seats appointed for them without the slightest confusion or delay.

The ceremony was performed by the Rev. David Anderson, Rector of St. George's, who at the head of the choir met the bride at the entrance of the church and preceded her to the altar. There the bridegroom was waiting attended by his best man, Major Hawker, Coldstream Guards. Miss Royle, who was given away by her father, wore a lovely Princess robe of rich Brussels applique lace over silvered net, and trimmed at the foot with a Vandyck flounce, from which branches of embroidered raised silver lilies tapered to the waist, the leaves of the flowers being edged with a tiny lace frill. A spray of the embroidery crossed the corsage, which was softened by a large square lace collar, and there were pretty lace elbow sleeves. With this robe was worn a courttrain of gauged spot net each gauging separated by a band of fine old point de Gaze lace, and garlands of the embroidered silver lilies were introduced, matching the embroidery on the robe. The bride wore no ornaments. Her tulle veil fell over a chaplet of orange blossoms and she carried a sheaf of white lilies. The bridesmaids were Miss Victoria Royle, Miss Hermie and Miss Violet Beauchamp (the bride's cousins), Miss Daisy and Miss Gertrude Maclean (sisters of the bridegroom), Miss Margaret Maclean (his cousin), Miss Ella Rayne, and Miss Ethel Lambert. They wore charming gowns of white blonde lace on soft white satin, the bottom of the skirts trimmed with Empire wreaths of pink chiffon roses, set in by garlands of blue ribbon, run through the lace. The tops of the bodices were transparent,—and two bretelles of blue ribbon, veiled in lace, crossed the shoulders and finished under a deep folded belt of blue satin, trimmed at the back with little rosettes and short folded ends. A butterfly bow of lace was fastened in the front of the bodice with festoons of the pink rose; with small green foliage falling at each side. The elbow sleeves were in two puffs, divided by a bracelet of blue ribbon and a single pink rose, and terminated in lace ruffles. The pretty hats were made of white tulle, narrowly frilled with blonde lace. The round brims were very much raised off the face in front, and to one side, and out away at the back, which was filled in with a bow, and ends of wide blue ribbon edged with lace. The crowns were encircled by a band of blue ribbon and inside on the raised brim were a large cluster of little pink roses and foliage and a blue bow. The bridegroom gave the bridesmaids bouquets of pink banksia roses tied with blue streamers, and turquoise and pearl pendants—dresses, hats, bouquets and ornaments making a beautiful harmony of delicate pompadour colouring.

After the ceremony, Mrs. Royle held a reception at 22, Charles St., Berkeley-square, kindly lent by Miss Warmald, which was numerous and fashionably attended. Among those present were: —Sir F.R. and Lady Wingate, Sir Ronald and Lady Lane, Sir George and Lady Faudel Phillips, Col. Allan Maclean, Sir James and Lady Heath, Judge Royle, Capt. and Mrs. Middleman, Sir Fitzroy Donald and Lady and Miss Maclean, Mr. and Mrs. Douglas Morice, Capt. Gaisford, Sir Gerald Fitzgerald, Mr. and Mrs. Greville Palmer, Col. Friend, Capt. St. Clair MacEwen, Mr. and Mrs. Scott-Dalgleish, Capt. and Mrs. George Hunter, Baroness Malortie, Capt. C. H. Leveson, Col. and Mrs. St. John Gore, Sir Charles and Lady Cayzer, Capt. O'Sullivan, Capt. and Mrs. Hay, Col. and Mrs. Bernard, Capt. and Mrs. Muter, Capt. and Mrs. Way, Mrs. H. Dudgeon, Mr. and Mrs. Barton Stewart, Capt. C. McKay, Sir Thomas and Lady Sutherland, Mr. Rosing, Mr. and Mrs. Favarger, Capt McLeod, Viscount Errington, Mrs. Cassel, Mr. and Mrs. Snow, General, Mrs. and Miss Slade, Hon. Arthur and Mrs. Davey, Sir John and Lady Denison Pender, Mr. Joseph, Mrs. Dilberoglue, Dr. and Mrs. Warnock, Mr. and Mrs. Robert Mond, Sir Auckland Colvin, Mr. and Mrs. Shakoor, Dr. and Mrs. Sandwith, Sir William and Lady Willcocks, Col. A. Harington. Capt. Percival, Judge and Mrs. Satow, Maj.-General Kekewich, Mr. Somerset Maclean, Major and Mrs. Delavoye, Sir Eldon and Lady Gorst, Colonel Nason, Captain Charlton, Major Garcia, Sir John and Lady Rogers, General Sir A. Lyttleton Annesley, etc.

Later in the afternoon the bride and bridegroom left for Haywood-park, Maidenhead (lent for the honeymoon by Mr. Granville Palmer), the bride wearing a soft white

### 3.14. CAIRO WATER SUPPLY. DR. BITTER'S REPORT.

We have received from the Cairo Water Company Dr. Bitter's report upon the water as at present supplied to the greater number of the Cairo districts from the artesian wells at Rod-el-Farag, and we give below a translation of this report:—

“The water of the wells is absolutely clear and limpid and without colour. It has no smell and is of a very pleasant taste. Its temperature is 23 Cent. The water contains no bacteria and is sterile.

“In comparing the chemical analysis of the well-water and of the Nile water one sees that there is no very pronounced difference between the two. There is only the hydrometric degree which was greater in the case of the well-water.

“During the time of the high Nile the well-water is about twice as hard as the Nile water, but this difference decreases during low Nile, to such an extent that, during the month of May for example, the rates of hydrometric degree of the two waters is reduced to 7 : 5.

“The high hydrometric degree of the well water is due to the presence of a larger quantity of calcium bicarbonate and magnesium bicarbonate, and not to an increase in the quantity of calcium sulphate. On the contrary, the well-water contains less sulphuric acid than the Nile water, especially when the Nile is at low-water mark.

“In other respects the hydrometric degree of the well-water is very moderated and the water of the Embabeh wells can be considered as a very sweet water. A considerable amount of the water used for drinking in the large towns of England, Germany, and France has the same degree of hardness or is even still harder. A water is generally considered as distinctly hard only when its hydrometric degree exceeds 30 French degrees, and the hydrometric degree of the well-water of Embabeh is about 20.

“The calcium contained in the well-water is almost exclusively in the form of calcium bicarbonate and gives to this water a particularly fresh and agreeable taste, which we are accustomed to find in good water springs. This constitutes a real advantage in comparison with Nile water, which contains much less carbonic acid. The well water also contains less sodium chloride than the Nile water. During low Nile the amount of salt found in Nile water is about 2 1/2 times as great as that found in the well-water.

One can consider the well-water as having the same origin as the Nile water, i.e., as a Nile water naturally filtered through beds of soil. But this filtration has not taken place in the proximity of the wells; it must have traversed for a considerable length the underground beds, as is proved by the differences in the chemical analyses and by the constant temperature of the well-water (a temperature equal to the annual mean temperature). It may thus be described as the water of the subterranean Nile which accompanies the superficial Nile and has the same origin as the latter.

“The taste of the Nile water does not differ sensibly from that of the well-water. Most people, and especially the Arabs, are unable to distinguish with certainty the two waters, as I have been able to prove by direct experiments.

“The well-water is a drinkable water of the first quality as much from the point of chemical analysis as from the point of taste, and especially from the fact that it is absolutely free of living germs.

“Being given the geological configuration of the aquiferous beds and the construction of the wells it is absolutely impossible for this water to become contaminated by the filtration of unhealthy water. During the three years that two of these wells have been worked almost continuously day and night to the amount of about 4,000 cubic metres each per day, the chemical composition of the water has remained unchanged.

“The water of the Embabeh wells ranks, therefore, amongst the best of the natural drinking waters known, and the town Cairo may be congratulated on possessing a supply of drinkable water which is no way inferior to the best waters of the whole world.”

### 3.15.

mousseline de soie richly incrustated with renaissance lace in handsome design. The bodice was draped en bolero with front of the mousseline de soie, inserted with lace, and there was a folded belt of soft white satin, the belt and bodice trimmed prettily with little satin bows. The picture hat was of white tulle in soft cloudy frills, and with a wreath of pink heather and roses round the crown, tied at the back with a blue ribbon bow. Mrs. Boyle wore a most becoming gown made of light blue satin veiled in blue chiffon and again in chiffon of a rich tone of purple. The skirt was finely gauged and trimmed at the foot with garlands of chiffon. An effective touch was a band of wide chene ribbon at the foot on the blue chiffon underskirt, showing through with charming result. The gauged bodice had frills of creamy silk lace about the neck, and a bow of blue and silver shot tissue was fastened at the bust, and the waistband was of purple ribbon. On the graceful sleeves, the pale blue chiffon appeared as small puffs under a loose elbow sleeve veiled by the darker fabric. The toque, smartly turned up at the wide back, was slightly peaked in front, and made of tulle matching the gown, embroidered with ribbon straw to match ribbon and finished by a handsome purple ostrich feather. Mrs. Murray Cookesley, who gave the bride her fine painting of “Circe resplendens” as a wedding present, wore a picturesque dress designed by herself, made of pearl great voile, under a tunic of rare gold lace, the bodice embroidered with pearls. A pearl fringe finished the white satin sleeves, and there was a belt of the same satin. The toque was composed of grey ostrich feathers and white roses.

## 4. THE EGYPTIAN GAZETTE, THURSDAY, JULY 13, 1905.

### 4.1.

#### 4.1.1. EGYPTIAN SHARE MARKET.

London, July 7

Markets here are in a state of summer holiday slackness, and, for the time being, at any rate, there seems very little probability of their being stirred into activity. Of course there is always the possibility of peace negotiations coming to a head sooner than is generally anticipated, especially as Russia's hand is being weakened by internal troubles. The spirit of revolt is abroad in all parts of the Tsar's dominions, and the mutiny on certain of the warships is evidence of the extent of the disaffection in the navy. From the attitude of the mutineers and their comrades on the other vessels, as well as of large numbers of the more dangerous section of the residents in the towns, it is evident that little provocation would be required on the part of the authorities to bring about an open revolution, the consequences of which are terrible to contemplate. The seriousness of the position is now evidently realised.

Mr. Takahashi, the Financial Agent of the Japanese Government, has arrived here for the purpose of completing the arrangements for raising the new £30,000,000 loan, which is likely to be very favorably received. By the time this reaches you it will be a fait accompli. It is stated that in London the issuing banks will be Parr's Bank, the Hong Kong and Shanghai Bank, and the Yokohama Specie Bank. The loan runs for a period of 20 years and bears 4 1/2% interest. The issue price will be 90.

The mining section is decidedly weak, and Kaffirs are in a sorry plight. There is little inducement to support most of the African and Westralian properties in this market, and there has been a good deal of forced selling during the past week. This, unfair as it may appear, reflects severely on Egyptian mines, which suffer from neglect and want of public confidence in anything of this class.

As regards South Africans, it is thought that the Barnato proposal re amalgamation with the Johnnies Investment Company will have sickened investors for some time to come. This has a serious effect on the market, as an increase of confidence is regarded as necessary in order that further capital can be obtained for carrying out the fresh developments which have been started.

The market for Home Government securities is dull. Consols closed at 90 1/8 for money and 90 1/8-1/4 for the account.

The Bank return shows large movements in connection with the close of the half-year. The coin and note circulations increased considerably, and the reserve is £1,167,000 lower at £26,201,000, and its proportion to current liabilities has fallen 3 5/8 to 42 5/8 per cent.

The Paris market appears to be still to some extent under the influence of the Morocco scare, but as the crisis may now be safely said to be almost past, there should soon be an increase of business on the Bourse, provided Russia does not collapse entirely. Suez Canal shares are f.4,430 ex-coupon of f.95.89, showing a nice margin on the price.

Other Egyptian stocks than those already referred to keep fairly steady, Dairas being a fraction better at 28 1/8, and Agricultural Banks a firm market at 13 3/4. Nationals are unchanged at 26 1/4.

#### 4.1.2. THE COTTON MARKET

Liverpool, July 6.

The sensational rise in American Cotton has caused Egyptian Cotton to advance in sympathy, which has had the effect of curtailing the demand from spinners. The business this week has therefore been only moderate. Quotations of Brown are 7/16 per lb. and Upper 1/4 per lb. higher for the week.

In Futures an active business has been done at fluctuating prices, and the following are the latest values : —

July 7.38	Sep. 7.33	Nov. 7.31	Jan. 7.21
Aug. 7.36	Oct. 7.33	Dec. 7.25	

American Futures. — The market this week has experienced great activity and excitement, and prices advanced 80 points from the closing rates of Monday to the opening prices paid yesterday morning ; later a reaction set in and prices declined sharply. To-day the tone is unsettled at about 20 points below the extreme rates touched. The Bureau report has of course been mainly responsible for this extraordinary advance. The condition of 77 % for June indicates a most serious if not disastrous state of the crop ; the weekly government reports did not forecast such a statement for the month and private information generally favored an improved condition during June. It is impossible to formulate any definite opinion ; speculation in America has run wild and manipulation is daily at work to raise or depress values ; but the possibility that the condition of the Crop has been exaggerated, and the fact that the price is now 5 3/4, should we think make operators cautious, which will in time probably lead to some further reaction. The following are the quotations

July 5.85	Oct./Nov. 5.83	Feb./Mar. 5.83

### 4.1.3.

ARISTON AERATED WATERS Guaranteed Distilled. ALEXANDRIA! 7 Rue de la Poste. CAIRO opposite the Tramways Co. Works, Sharia Sahal, Kasr-el-Nil

### 4.1.4. *Societe Internationale des Employes d'Alexandrie*

La Société Internationale des Employés d'Alexandrie tiendra ce soir à 9 heures une séance extraordinaire, dans la salle du Conservatoire de musique, située dans l'immeuble occupé par les grands magasins du Printemps, Rue Porte Rosette.

Le but de la convocation est de soumettre à l'assemblée la question de la fermeture générale des magasins le Dimanche et les moyens que le comité a trouvés pour y arriver. On sait, en effet, que certains négociants opposent à cette réforme humanitaire une résistance aussi obstinée qu'incompréhensible.

### 4.1.5. *BULLETIN DE LA BOURSE*

( Aujourd'hui à midi et demie)

Les affaires se sont bornées, comme hier, au Trust et aux Privilégiées Tramways d'Alexandrie qui haussent le premier de 1 3/8 à 1 7/16 et les secondes de 162 à 165 1/4. Le reste du marché est à peu près nul.

Ainsi que nous l'avons prévu dans notre chronique financière, le cours de la nouvelle émission National Bank est retombé au cours de l'ancienne. Toutes deux cotent maintenant 26 5/16 acheteurs.

La Banque d'Athènes reprend de 122 à 122 1/2, les Markets de 22/3 à 22/9, les Eaux du Caire de 1110 à 1115, et la Ramleh Railway de 7 1/16 à 7 1/8.

Par contre l'Agricole réactionne de 13 7/8 à 13 13/16, la Daïra de 28 1/8 à 28 1/16, la Nungovich de 9 1/2 à 9 7/16, l'Anglo-Américain Nile de 5 1/2 à 5 7/16.

### 4.1.6. *PASSENGER LISTS.*

#### 4.1.6.1. *ARRIVALS.*

*Cotons F.G.F.Br.*

Dans la matinée; prix plus haut pour juillet tal. 15 /— à —/— ; plus bas pour juillet 14 15,16 à — /—.

*Grains de coton*

Dans la matinée ; prix plus haut pour juil. P.T. 58 3/4 à —/—: plus bas pour jail. 58 1/4 à —/—.

Remarques

(De Midi à lh. p.m.)

Cotons.—L'importance des embarquements a eu plus d'influence sur le marché que la faiblesse de Liverpool signalée en avant-bourse, et la dernière partie de la séance a été plutôt brillante, avec des cours en reprise et une tendance excellente. Le juillet surtout continue à être en faveur.

Graines de coton.—Marché inactif, mais finissant ferme avec des dispositions à monter.

Fèves.—Nullité oomplète d'affaires.

Bourse Khédiviale. le 12 juillet 1905.

## 5. THE EGYPTIAN GAZETTE, THURSDAY, JULY 13, 1905.

### 5.1. THE PANAMA CANAL.

I am afraid that President Roosevelt's domestic worry, as you term it in your number of the 10th inst., will not cease for many summers to come. Having resided on the Isthmus of Panama for seven years and contributed a series of articles to the "Times," "Saturday Review," "Scotsman," "Chambers' Journal," and "New York Herald," I can speak as an authority with "connaissance de cause." First and foremost, without entering immediately into technical and financial matter, such as the Chagres River, Culebra mountain, the ports of Colon and Panama, the expense and difficulty in finding labour, let me refer to the climate and the sanitary conditions of the Isthmus. Yellow fever resides permanently, whether in an endemic or epidemic form, and until this scourge is eradicated the canal will cost millions sterling, take years to build, and thousands of lives will be its holocaust. Has there been any specific discovered to save a patient once attacked with this disease, and what percentage die and how many recover? There are only special beings, "lucky dogs," who seem exempt from this fatal disease. A muscular, lean man acclimatised in a torrid zone between the ages of 40 and 60 appears to escape its virus, providing he is abstemious and refuses to drink Panama water in any shape or form. Youth and middle age are more subject, especially those who have not lived in or frequented a warm climate. Sanguine, lymphatic, and corpulent natures are tempting preys to the disease. To be acclimatised is to be in a constant state of anaemia, a state which the microbe despises. Children seem to be exempt. I am not alluding to the indigenous population, for it would be very unfortunate if they could not live in their own country, although some, very few, do die from yellow fever through contagion or intemperate habits. The native population are as yellow as quinces, and in a perfect state of chronic anaemia. The yellow fever microbe is seldom the tenant of a black man ; he has enough to do with other bacilli.

During my sojourn on the Isthmus, with a change of air every two years, I knew but very few Europeans who recovered from an attack, and these attacks were slight. None ever weathered a virulent case. We have amongst us to-day a worthy and excellent Sister of Charity of the Order of St Vincent of Paul, who for several years was the Angel of Mount Ancon hospital, where she unremittingly tendered her care and services to the last moments of many a patient

To construct a canal through these Nicropolai you must commence by purifying the whole Isthmus, and changing the sanitary conditions, then you may succeed in improving the climate, but otherwise you can bury your dead

and spend your millions, as the French company did from 1881 to 1885. It was not a "French folly," but a French misfortune. They went boldly and gaily to work, but M. de Lesseps never dreamt of such a climate nor contemplated such a task. He preferred the Panama route on account of its being shorter than others proposed, but had he selected any other, the Atrato, Darien, or Nicaragua, even Tehuantepec, he would have succeeded. His genius and popularity would have moved mountains, but he could not battle against the hidden monster of disease which rendered his staff and workmen fearful, nervous, and careless. Engineers-in-chief died, like MM. Blanchet and Boyer, men of vast experience and capacity. In a few months the wife, son, and daughter of Mr. Dingler, the director general, were victims of yellow fever. All collapsed; it was a forlorn hope with a "sauve qui peut" which ushered on the scene in many cases the fiend of dishonesty. "Après moi le deluge" was the password.

The luxuriant vegetation and the dense foliage on each side of the proposed line of the Canal prevent the rays of the sun from penetrating the accumulated heaps of dead and decayed vegetable matter from which emanate a mephitic vapour charged with the germs of disease and pestilence. What part of the Isthmus can be pointed out as free from these seeds of malignant fever? Is it in the swamps of Rio Grande, on the heights of Emperador, Culebra, or Obispo? On the plains of Mamei, Matachin, or Bohio-Soldado? Surely not at Gatun nor Colon! The fever lurks in the dry season from December to March and is ready to sally forth as soon as the change is taking place from April to June and from September to November. Seasons are only two, the rainy and the dry, which fairly divide the year. The former is torrential; the storm gathers in the hours of the antemeridian and bursts with violence, accompanied often with tremendous flashes of fork lightning. I have, on several occasions, seen objects struck with unusual force, displacing blocks of masonry, reducing planks into splinters, melting leaden gutters on the tops and sides of houses. These phenomena are independent of a few good shakes by earthquakes and a few revolutions now and again as a pastime. These are the Isthmian games of this chosen spot. After a rain storm you have rivers and rivulets. The Chagres rises with an extraordinary rapidity. It rose 30 feet in one night in 1882 in one of these charming freshets mandwashed away the rails, sleepers, and embankments of the railway between two sections near Barbacoas.

Trees grow without culture, (no need of arable land), on the tops of houses, and your boots and shoes in one night in the wet season are coated with a lovely soft mildew like lambswool. As for perspiration, you are in a constant state of liquefaction, from the damp heat before the storm burts, when you are partly relieved. Then comes the dry season, when the land is absolutely arid—better the Sahara, even with Jacques Ier. as Emperor. It is difficult to obtain water and one is obliged to go several miles to bring a pailful or purchase one from the trickling Matasnillo and its stagnant pools. And then it is not as if your journey could be rewarded or your purchase satisfied with a meagre quantity of good water, but you are confronted with a pail of dancing animal culae. The house trees fade and die and are whirled away from the slender roots with the breath of Aquilon; but do not weep! The tiles will bring forth others next season. The streets and roads are watered with clouds of fine dust and the Savanna is a parched plain. "O fortunatos nimium, sua si bona norint Panamaniam!"

This is only climatic, what about the technical side? Will the Culebra be ever mastered, will it be prevented from closing its wound when it is cut? This is the phenomenon of the moving mountain. What about the Chagres? is that to be muzzled, how and when? By a deviation to the east of Colon or by a dam which in my time was to retain 2,000,000,000 cubic metres of water. Well! if it comes to grief on a freshet like 1882 it will remind us of the flood without the ark which will not be ready to receive the Isthmians of Panama. This sovereign miniature State was wrenched from the territory of Columbia. A second Andorra with a Bishop as President instead of an engineer. The former will be more useful in this case as there will be only souls left. What about the ports of Panama and Colon and the three-mile dredging in open roadstead to Flamenco? MM. Barratoux, Latellier & Co. worked like Spartans at this channel but they found out to their astonishment that as fast as they dredged in front it filled up behind, and for a surplus of misery they lost their director, Mr. Lilas, and part of their staff from yellow fever. Mr. Latellier thought it wiser to abandon his hourglass and take up journalism.

Is it a level or a lock canal? Ask Mr. Eiffel if he knows about the lock system. I know he is a "tower" of strength, but when he found that the Atlantic rose only six inches and the Pacific 20 feet he thought that, considering yellow fever was to be calculated with this rise and fall, it would be prudent to leave that problem for later on and construct a more profitable enterprise in the shape of "la tour d'Eiffel."

I never doubt American enterprise with money and science, but they have not yet discovered the antidote for yellow fever, nor the remedy to prevent staff and workmen deserting. Moreover, will they be able to induce West Indians to come to the Isthmus, only to return invalided and increase the poor rates? And if they do, will the governors allow the depopulation of their dependencies? If they want to get rid of the coloured population of America the best thing would be to make them a present of the infant Republic, and allow them to govern themselves and dig the Canal. The coloured American race would be extinct in a very few years. They might save a couple to please Bostock.

If they could invent automatic excavators, diamond drills, self-working dredgers, etc., I could believe that the Panama Canal was approaching its construction, but as long as "Yellow Jack" holds its sway I must wait until the spread Eagle has conquered him.

Panama is more American now than Colombia, and had not America supported the Franco-Panamanian visionaries with Mr. Bunau-Varilla as High Commissioner and Envoy-extraordinary and Plenipotentiary per interim, the Canal would be the same to day as it was 25 years ago, but with £15,000,000 more in the American Treasury. There is a notice out, I see, that stray and ownerless dogs found in the San Stefano quarter during the night of Friday and Saturday at daylight will be poisoned by the police. I am off—Vale.

## 5.2. HEAT AND CHOLERA.A DANGER TO EUROPE.

Professor Chantemesse, an eminent French doctor, and Director-General of the Paris Hygienic Bureau, says, according to the "Daily Mail" correspondent, that Europe is seriously threatened with a cholera epidemic this year. During the last four years, he states, cholera has been advancing rapidly westwards, and it now threatens to invade Europe by four different routes: (1) Through Moscow, St Petersburg, and the Volga river ; (2) through the Black Sea, Odessa, and Central Europe ; (3) through the Danube and the Balkan principalities ; (4) through Constantinople, the Adriatic, and Italy. All that is wanting now for the advent of cholera in Europe, says the Professor, is a long spell of hot weather.

## 5.3. ROYAL BIRTHDAY.THE PIGMIES AT BUCKINGHAM PALACE.

London, July 7.

Princess Victoria, whose thirty-seventh birth, day it was, yesterday received many presents and congratulation. Her Royal Highness, who takes the keenest interest in, and displays the warmest affection for, her younger relations, is understood to have selected for the celebration of her birthday a garden party, to which her nieces and nephews and some fifty juvenile guests were invited.

In the grounds of Buckingham Palace Queen Alexandra arranged an entertainment for the young folk, and arranged for the presence of the forest pigmies, Jumbo junior, the baby elephant, two performing ponies, and a prestidigitateur of marvellous powers.

The Duchess of Sparta and her children, with Prince and Princess Frederick Charles of Hesse, and their little ones, came up from Seaford for the occasion, and joined the Crown Prince of Greece, whom they accompanied to England on Monday last, and who has since been staying at the Palace as the guest of the King and Queen. All her Majesty's grand-children also came up for the day.

The guests were received at the grand entrance, and conducted to one of the spacious drawing-rooms, where tea was provided for them, accompanied by vocal music.

Of the attractions in the grounds the keenest centred, at least for a time, in the pigmies, who were armed with their tiny bows and arrows. Grave and solemn, seated beneath a tree in a shaded part of the grounds, the pigmies awaited the arrival of her Majesty, the Princes and Princesses, and guests, and submitted, without any apparent shyness or unwillingness, to the interested scrutiny to which they were subject. When attention was diverted in turn to the performing animals and the mystifications of the conjurer, the pigmies appeared as interested in the performances as the general body of guests.

## 5.4. THE CONSTANTINIDI CASE.HUSBAND AND DIVORCED WIFE

The hearing of the case of "Constantinidi v. Constantinidi and Lance" was resumed in the Court of Appeal last Thursday, before Lords Justices Vaughan Williams, Stirling, and Cozens Hardy. It was an appeal by Mrs. Julia Lance from a judgment of Sir Franois Jeune given on December 5, 1904, directing that an order of the Registrar as to the alteration of settlements made on her marriage with Mr. Demetrius Sophocles Constantinidi should be varied. Lord Justice Vaughan Williams said that the judgment appealed against had been given by the late President in exercise of the discretion conferred on him by section 31 of the Matrimonial Causes Act, 1857, with reference to the variation of a marriage settlement after the decree for divorce had been made absolute, and was in the petitioner's favor. His Lordship read the facts as stated by the late President, under which the proceedings for divorce were instituted by the husband. The President had pointed out that the authorities were in favor of the principle that where a wife had by her misconduct broken up the home it was justifiable to give her husband a portion of her income to restore him to the position he would have occupied, and also on the broad principle that a co-respondent should not be allowed to profit by his own iniquity. The President had found that the petitioner had not himself been guilty of misconduct before the date of the respondent's going to South Dakota with the obvious intention of procuring a so-called divorce and contracting a bigamous marriage. No doubt, continued Sir Franois Jeune, after she had gone the petitioner himself was guilty of shameless misconduct, but the President was unable to say that she had not conducted to her husband's misconduct. Having granted a divorce to the petitioner in this case—a decision which had not been challenged—he could not hold that the petitioner's misconduct should debar him from the relief he sought. He did not propose to take the £25,000 damages awarded by the jury or the unpaid costs into account, but he had to consider what the respective settled incomes of the parties were. The petitioner's was £710 and the respondent's £2,200, the latter derived from a capital sum of £51,000. The President, taking those figures and facts into account, varied the order of the Registrar, who had reported as follows : "Having regard to the verdict of the jury against the petitioner, to their being no issue of the marriage, and to no necessity being shown for providing for the petitioner out of the wife's trust funds, it is submitted that no order should be made in variation of the respondent's settlement of October 23, 1889." In his (Lord Justice Vaughan Williams') opinion that order of the Registrar was the right order. But the late President had varied that order and had directed that the trustees should pay to the petitioner two sums yearly of, roughly, £1,000 each, one to be paid immediately, and one after the death of the respondent's mother. The order of the late President must be set aside, and an order made in the sense of the Registrar's report.

Lord Justice Stirling and Lord Justice Cozens-Hardy concurred.

It was decided that the costs of the appeal should be paid by the petitioner.

## 5.6. ARMY AND NAVY.

London, July 4.

The new force of cavalry which is about to be raised in Egypt will no doubt attract many officers to that service, for the land of the Pharaohs is a popular place to soldier in. At the same time our cavalry regiments cannot afford to part with many officers, the commissioned ranks being depleted as it is.

The S.S. Dunera is due to leave Southampton on the 27th of September with drafts on board for Gibraltar, Malta, and Egypt. The same liner will take out drafts to Egypt in November.

Colonel E. K. G. Aylmer, C.B., an officer well-known in Egypt, will retire on half-pay from the command of the 19th Hussars at the Curragh on the 17th inst. under the four-years' rule. He will be succeeded by Brevet Lieut.-Colonel H. G. De Pledge, the second in command.

The administration of the King's African Rifles, of which there are five battalions, has been transferred from the Foreign Office to the Colonial Office. Brigadier-General Sir William Manning, Inspector-General of the force, retains that appointment under the transfer of administration.

All the British cavalry regiments in India have been re-armed with the short rifle. The mode of carrying it has not yet been decided upon.

The War Office has taken a strong step towards reducing the expense of living in the cavalry regiments of the line, and the King's Regulations will be amended accordingly. All extravagances, which heretofore have been the means of keeping young men of moderate means out of the service, are to be put down, and commanding officers who fail to aid and assist the authorities in keeping expenses well within bounds will be liable to be summarily dealt with. The system of keeping two sets of accounts, one showing the legitimate outlay, and the other expenses which hardly come under that heading, is to be suppressed, and semi-private accounts will be tolerated under no circumstances. The Army Council is of opinion that no difficulty would be experienced in keeping up the supply of eligible candidates if the expenditure were reduced. Regimental drags have been marked down for abolition, as being a very expensive item. It must be remembered that many deserving officers who won commissions in the late war had to resign these hard earned commissions after the war closed owing to the expense in cavalry regiments. This time the Army Council seems to be in earnest.

Germany's campaign now in progress in South-West Africa has witnessed some successful experiments in the use of camels for army transport. The camels are brought from Fuertura Ventura, an island of the Canaries group, and have proved specially useful for transport across the stretch of shifting sand, about forty miles in extent, which separates the coast from the interior, and which has proved fatal to ox and mule transport. The animals are able to cross the sand without water and carry a load of 600lbs. each. They are fed chiefly on alfalfa, chaff, and barley, and stand the change of climate well.

The youthful King of Spain is determined on having a Navy commensurate with his dominions. The programme is a modest one, embracing four battleships of 16,000 tons displacement, five armoured cruisers of 10,000 tons displacement, and a dozen smaller craft. The programme is to be spread over a number of years. The last of the cruisers of the Orlando type building for the Spanish Navy is in hand, and it is ironically said that at the present rate of construction she will be ready for commission about the year 1910.

## 5.7. VISITORS LIST.WINDSOR HOTEL, ALEXANDRIA.

## 6.12. AGRICULTURAL BANK OF EGYPT New Issue of Shares for Increase of Capital.

IN PURSUANCE of an Extraordinary General Meeting held on the 18th May 1905, the Board of Directors of the Agricultural Bank of Egypt offer 248,000 new shares of the said Bank of Five pounds sterling each. These shares will constitute an increase of the Capital at the Bank, and are issued in conformity with the Statutes at the price of Five Pounds sterling per share, payable on application.

Application should be made: –

in EGYPT to the Head Office of the National Bank of Egypt at Cairo and to the Branch at Alexandria,

in LONDON to the London Agency of the National Bank of Egypt, 4 & 5, King William Street, E.C.

The new shares will rank for dividend from the 1st January 1906, that is to say from the beginning of next year.

Every shareholder has the right on application to an allotment of one new share in respect of every old share held.

All shareholders who wish to exercise their rights must, under pain of forfeiture of those rights, lodge their applications at one of the places named above on or before the 2nd October 1905 depositing their Share Warrants together with the total amount payable, viz : £5 per share.

The President of the Board of Directors,

(signed) Elwin Palmer.

Cairo, the 8th July 1905.

26218-5

## 6.13. NOTICE

Is hereby given to all persons having claims against the estate of the late Miralai Boulnois Bey, Officer Commanding the Bahr el Ghazal district (Major, Royal Artillery) that such claims must be forwarded endorsed as such to the Assistant Adjutant General, War Office, Cairo, to arrive on or before the 7th August, 1905, after which date they will not be taken into consideration.

26212-6-6

## 6.14. NOTICE.

NOTICE is hereby given to all persons having claims against the estate of the late Kaimakam Fell Bey, Inspector, Bahr-el-Ghazal Province (Royal Navy), that such claims must be forwarded endorsed as such to the Assistant Adjutant General, War Office, Cairo, to arrive on or before the 7th August, 1905, after which date they will not be taken into consideration.

26221-64

## 6.15. Societe Anonyme des Eaux du Caire AVIS

La Société des Eaux du Caire porte à la connaissance du Public, que son installation pour la distribution des Eaux à Koubeh-Zeitoun et Matarieh étant achevée, elle est prête à fournir dans les dites localités, l'eau pour la consommation, arrosage des jardins, chantiers de constructions et tous autres besoins.

Toute demande de concession devra être faite par lettre à l'adresse du Directeur de la Société des Eaux du Caire.

Le tarif du prix de l'eau dans les dites localités, tant par abonnement fixe que par compteur, est à la disposition du public, dans les Bureaux de la Société Avenue de Boulac au Caire.

La Société est prête à établir ses canalisations d'eau dans les rues non pourvues de conduites, lorsqu'elle aura reçu des demandes suffisantes de concession pour une même rue.— Les habitants de Koubeh, Zeitoun et Matarieh sont donc priés de présenter leur demandes par groupes résidant dans une même rue, afin de permettre à la Société d'examiner sans retard leurs demandes, en vue de canaliser et de leur accorder des concessions d'eau.

Le Caire, le 23 Janvier 1905.

Le Directeur, ASTLEY P. FRIEND.

25829-40\*-29

## 6.16. Municipalité d'Alexandrie AVIS

Il est porté à la connaissance des propriétaires de chiens qu'il pourront retirer ou faire retirer au bureau Sanitaire de la Municipalité, à partir du 12 Juillet courant de 8 h. 1/2 a.m. à midi, le dimanche et jours ferrieré excepté, la medaille que doit porter tout chien circulant sur la voie publique.

Les propriétaires seront tenus d'indiquer très exactement leurs nom, prenom, nationalité, adresse (rue, propriété, cheikh el Hara, Kism, etc.) ainsi que la race et la couleur du chien, si celui-ci n'est pas présenté à la Municipalité.

La médaille est délivrée gratuitement.

Passé le 10 Août tout chien qui n'en sera pas porteur et qui sera trouvé errant, sera saisi et conduit à la fourrière de Mex.

Alexandria le 8 Juillet 1905.

L'Administrateur

26225 3 3 (sign.) W. P. CHATAWAY.
